

# B.Sc. Honours Program: Major in Environmental Geomatics (Co-op)

---

Name: \_\_\_\_\_ Student # \_\_\_\_\_

## About the Program

This program provides opportunities for study of the processes and properties of the biophysical environment and a core foundation in the analytical techniques (i.e. Geographical Information Science and Remote Sensing) used for their interpretation, analysis and presentation. Graduates of the program will have unique specialty in the application of spatial technologies to the study and assessment of biophysical and Earth surface processes. This check-list applies to students enrolled in the Co-op program. Students enrolled in the regular stream should consult the check-list specifically for that program.

## Check-list [based on 2020-21 calendar]

*Bring this list with you when you come for counselling and leave it with your counsellor in your semester of graduation. A list of counsellors is posted in the first floor corridor of the Hutt Building during registration period. At other times check with the secretary in Hutt 119*
