

B.Sc. ENV Honours Major in

ENVIRONMENT & RESOURCE MANAGEMENT

[Co-op option]

DEPARTMENT of GEOGRAPHY,
ENVIRONMENT AND GEOMATICS

COME EXPLORE WITH US

Why our program?

This major is designed to provide a strong interdisciplinary grounding in environmental sciences.

Management and decision-making skills are emphasized for the application of scientific knowledge to environmental problems and the evaluation of environmental policies.

What skills will you develop?

Use Field Equipment (e.g., GPS, Streamflow Gauging) • Spatial Analysis In State-of-Art Software Data Sampling And Assessment • Map Design • Statistical Analysis • Writing Scientific Reports • Science Communication.

What are the benefits?

Through this unique four year degree program, you will gain the knowledge you need to balance in-depth science within a broader context of societal needs, economics and politics.

Co-op program available.

Environment & Resource Management

Gain skills that are fundamental to management of the biophysical environment and environmental decision-making.
