B.A. Honours Program:
Major in Environmental Governance (2020 and before)

Name: ____________________________ Student # ____________________________

About the Program

Environmental governance refers to the processes through which societies make decisions that affect the environment. Governments have long been dominant players in this context. However, in Canada and around the world, the ability of governments alone to address environmental problems is being called into question. As a result, contemporary environmental governance increasingly involves citizens, non-government organizations, and businesses.

The Major in Environmental Governance introduces students to the challenges of environmental governance. Students completing the major will have the skills and experiences needed to participate effectively in environmental governance in a variety of settings. They will find careers in the public sector, in environmental non-government organizations, and, increasingly, in the private sector.

Completion of required courses, and careful selection from among optional courses, will facilitate students completing a minor in Geography, Political Science, Economics, or other programs.

Check-list [based on the 2020-21 calendar]

This check-list guides you through the degree requirements. In addition, you may use the “audit” feature in WebAdvisor to help you understand the courses you still need to complete. Counsellors for Environmental Governance program.
