

# B.A. Honours Program: Major in Geography

Name: \_\_\_\_\_ Student # \_\_\_\_\_

## About the Program

Students in Geography study human interactions with the environment across geographic scales, from local to global. Within the program of studies students take courses in the physical and social sciences and are able to pursue a particular line of interest, for example in environmental conservation, climate change, environmental justice, food security, geomorphology, urban-rural change, or watershed management.

The 1000 level courses provide a foundation for the Geography programs and are prerequisites or are strongly recommended for many of the 2000 level courses. The 2000 level systematic courses are prerequisite to the corresponding advanced courses at the 3000 and 4000 level. Geography B.A. Honours Majors are eligible to take the B.Sc. Honours program Minor in Geographic Information Systems and Environmental Analysis which is described in the Undergraduate Calendar schedule of studies (Section X).

All Geography students are encouraged to consult with a faculty advisor regarding course selection, especially those students contemplating graduate or professional programs of study following completion of the honours program.
