# Learning Outcomes

## Course Learning Outcomes

This course introduces foundational concepts for understanding human-environment relationships. Our goal is to recognize how the world's most pressing environmental problems—climate change, biodiversity loss, water pollution, and so on—have their roots in societal structures and processes. We will achieve this by integrating perspectives from both earth system and social sciences.

The course is best described as two-fold. Each week we will learn key concepts—including earth system cycles and feedbacks as well as environmental governance and justice—that help us think about human-environment relationships. Each week we will also apply these concepts by exploring a range of case studies of environmental change, with a focus on food, energy, and water systems. Throughout the course, we will contrast issues and governance approaches from around the world, but with emphasis on Canadian and US contexts.

By the end of this course, you should be able to:

1. Identify and describe human impacts on the environment across a variety of earth systems and scales;
2. Define concepts from earth system sciences that characterize environmental change from a biophysical perspective (e.g., feedback loops, open/closed systems, nutrient cycles, etc.) and apply these concepts to specific cases and examples;
3. Discuss the social scientific concepts that drive human impacts on the environment (e.g., institutional failures, market failures, environmental racism, etc.) and different ways governments, companies, and civil society actors govern environmental change, and apply these concepts to specific cases and examples;
4. Investigate, evaluate, and synthesize diverse sources of knowledge about real-world, place-based environmental issues; and
5. Write a policy memo that provides an overview of what we know about a specific environmental change, its societal drivers, and potentially effective governance approaches.

# Teaching and Learning Activities

## Method of Learning

In this course, you'll learn how to explain the societal drivers of environmental change by *doing* and *reflecting*. You'll *do* by engaging with a variety of assigned readings—

academic and real-world materials including short background chapters from a textbook, policy reports, and peer-reviewed research papers. You'll also read, listen to, and watch content within each unit. Each unit introduces you to key concepts in earth system and social sciences and expands upon ones covered in the assigned readings. Case studies illustrate how these concepts explain environmental systems and changes in the areas of food and agriculture, fisheries, biodiversity conservation, and more. However, the only way you'll be able to make sense of all the material you're engaging with is by *reflecting* on it along the way. Each unit includes several activities such as "stop and think" reflection questions, interactive maps and charts, and "test your knowledge" quizzes. These are meant to help you solidify your understanding of the material by getting you to interact with and consider it more closely. To demonstrate your budding expertise in explaining environmental change, you'll conduct a small independent research project over the course of the semester.

## Course Structure

The course is organized into the following 12 weekly units:

- Unit 01: Overview and Earth System Science
- Unit 02: The Anthropocene
- Unit 03: Population
- Unit 04: Institutions
- Unit 05: Ethics and Values
- Unit 06: Writing Research Summaries
- Unit 07: Risk Governance
- Unit 08: Markets
- Unit 09: Political Economy
- Unit 10: Settler Colonialism
- Unit 11: Environmental Justice
- Unit 12: Synthesizing Research

## What to Expect for Each Unit

Each unit includes an introduction where you'll encounter the learning outcomes and assigned readings. In general, each unit consists of 1-3 relatively short background readings that you should take notes on before engaging with the rest of the content. The introduction is followed by 1-3 pages that review and/or introduce key concepts, and then 1-2 case studies that provide more concrete applications of these key concepts to a specific environmental issue, such as water scarcity, eutrophication, or biodiversity loss. Most units also include an exercise in which you'll be prompted to do a short activity related to the unit's theme and then reflect on what you've learned. Finally, most units also include a set of 8 true/false, matching, and multiple choice questions that will

clue you into the most relevant facts and definitions from the unit and solidify your recall of them.

The grade determination for this course is indicated in the following table. A brief description of each assessment is provided below. Select **Content** on the navbar to locate **Assessments** in the table of contents panel to review further details of each assessment. Due dates can be found under the Schedule heading of this outline.

**Table 1: Course Assessments**

<b>Assessment Item</b>	<b>Weight</b>	<b>Learning Outcomes</b>

Reflection Exercises (2 @ 10% each)	20%	3
Comprehensive Exam	13%	1, 2
Research Journal – Topic	5%	3
Research Journal – Sources	15%	3
Research Journal – Summaries	20%	3, 4
Research Journal – Policy Memo	20%	3, 4, 5
<b>Total</b>	<b>100%</b>	

## **Assessment Descriptions**

### **Weekly Quizzes**

There are nine online quizzes that test your comprehension of the ideas and facts from the course and your ability to define key concepts and identify them in real-world examples. Each quiz covers specific material from each unit, including content from the unit itself as well as from the assigned readings. While the course will have 9 graded quizzes, only your 7 best marks will be taken for grading (the 2 lowest quiz marks or non-completed quizzes will be dropped).

Please note that for the quizzes, you are not expected to memorize and recall specific, obscure numbers. Instead, you'll be asked questions about trends from distinct choices; as long as you generally remember the relative magnitude of something, you'll be able to select the right response.

### **Reflection Exercises**

The Reflection Exercises are designed to help you better understand the material covered in the course by exploring ideas from each unit in more depth. You will complete at least two exercises—one for each half of the course—and reflect on what you did in light of the associated unit's core concepts and ideas. Although you cannot submit more than two exercises for grading, you are highly encouraged to complete each Reflection Exercise to strengthen your learning for that unit.

### **Comprehensive Exam**

The Comprehensive Exam will cover material from Units 01-11 in the course, including specific content from each unit and the assigned readings. The exam is designed to assess and measure the knowledge you gain from the entire course and will test your ability to define elements of the course's key concepts and to identify them in real-world examples. As with the weekly quizzes, you are not expected to memorize and recall specific, obscure numbers. Instead, you'll be asked questions about trends from distinct choices; as long as you generally remember the relative magnitude of something, you'll be able to select the right response.

### **Research Journal – Topic, Sources, Summaries, and Policy Memo**

A key component of environmental science and policy is being able to formulate a research topic, gather sources to study it, summarize those materials, and synthesize what you have learned into a report. The Research Journal is the major assignment for the course and will be completed in four parts—Topic, Sources, Summaries, and Policy Memo—so that you can obtain feedback, reflect on this feedback, and make improvements as you work on the next assignment component. The Topic, Sources, and Summaries assignments will be completed during the semester, and the Policy Memo assignment will be due during the exam period.

## Netiquette Expectations

For distance education courses, the course website is considered the classroom and the same protections, expectations, guidelines, and regulations used in face-to-face settings apply, plus other policies and considerations that come into play specifically because these courses are online.

Inappropriate online behaviour will not be tolerated. Examples of inappropriate online behaviour include:

- Posting inflammatory messages about your instructor or fellow students;
- Using obscene or offensive language online;
- Copying or presenting someone else's work as your own;
- Adapting information from the Internet without using proper citations or references;
- Buying or selling term papers or assignments;
- Posting or selling course materials to course notes websites;
- Having someone else complete your quiz or completing a quiz for/with another student;
- Stating false claims about lost quiz answers or other assignment submissions;
- Threatening or harassing a student or instructor online;

- Discriminating against fellow students, instructors, and/or TAs;
- Using the course website to promote profit-driven products or services;
- Attempting to compromise the security or functionality of the learning management system;
- Sharing your username and password; and
- Recording lectures without the permission of the instructor.

## Submission of Assignments to Dropbox

The Sources, Summaries, and Policy Memo components of the Research Journal assignment should be submitted electronically via the online **Dropbox** tool. When submitting your assignments using the **Dropbox** tool, do not leave the page until your assignment has successfully uploaded. To verify that your submission was complete, you can view the submission history immediately after the upload to see which files uploaded successfully. The system will also email you a receipt. Save this email receipt as proof of submission.

Be sure to keep a back-up copy of all of your assignments in the event that they are lost in transition. In order to avoid any last-minute computer problems, your instructor strongly recommend you save your assignments to a cloud-based file storage (e.g., Google Docs), or send to your email account, so that should something happen to your computer, the assignment could still be submitted on time or re-submitted.

It is your responsibility to submit your assignments on time as specified on the Schedule. Be sure to check the technical requirements and make sure you have the proper computer, that you have a supported browser, and that you have reliable Internet access. Remember that **technical difficulty is not an excuse not to turn in your assignment on time**. Don't wait until the last minute as you may get behind in your work.

If, for some reason, you have a technical difficulty when submitting your assignment electronically, please contact your instructor or [CourseLink Support](#).

<https://support.opened.uoguelph.ca/contact>

## Late Policy

If you choose to submit your individual assignments to the **Dropbox** tool late, the full allocated mark will be reduced by 5% per day after the deadline for the submission of the assignment to a limit of six days at which time access to the **Dropbox** folder will be closed.

Extensions will be considered for medical reasons or other extenuating circumstances. If you require an extension, discuss this with the instructor as soon as possible and well before the due date. Barring exceptional circumstances, extensions will not be granted once the due date has passed. These rules are not designed to be arbitrary, nor are they inflexible. They are designed to keep you organized, to ensure that all students

have the same amount of time to work on assignments, and to help to return marked materials to you in the shortest possible time.

## Obtaining Grades and Feedback

Unofficial assessment marks will be available in the **Grades** tool of the course website.

Your instructor will have grades posted online within 2 weeks of the submission deadline, if the assignment was submitted on time. Once your assignments are marked you can view your grades on the course website by selecting **Grades** from the **Tools** dropdown menu on the navbar. Your course will remain open to you for seven days following the last day of the final exam period.

Final grades will be available at the end of the semester. Students can access their final grade by logging into [WebAdvisor](#) (using your U of G central ID).

Open Learning program students should log in to the [OpenEd Student Portal](#) to view their final grade (using the same username and password you have been using for your courses).

<https://courses.opened.uoguelph.ca/portal/logon.do?method=load>

## Rights and Responsibilities When Learning Online

For distance education (DE) courses, the course website is considered the classroom and the same protections, expectations, guidelines, and regulations used in face-to-face settings apply, plus other policies and considerations that come into play specifically because these courses are online.

For more information on your rights and responsibilities when learning in the online environment, visit [Rights and Responsibilities](#).

<http://opened.uoguelph.ca/student-resources/rights-and-responsibilities>

## Turnitin Originality Check

In this course, your instructor will be using Turnitin, integrated with the CourseLink **Dropbox** tool, to detect possible plagiarism, unauthorized collaboration or copying as part of the ongoing efforts to maintain academic integrity at the University of Guelph.

The Summaries and Policy Memo components of the Research Journal assignment submitted to the **Dropbox** tool will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers. Use of the Turnitin.com service is subject to the Usage Policy posted on the Turnitin.com site.

A major benefit of using Turnitin is that you will be able to educate and empower yourself in preventing academic misconduct. In this course, you may screen your own assignments through Turnitin as many times as you wish before the due date. You will

be able to see and print reports that show you exactly where you have properly and improperly referenced the outside sources and materials in your assignment.

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required; however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to make a booking at least 14 days in advance, and no later than November 1 (fall), March 1 (winter) or July 1 (summer).

Similarly, new or changed accommodations for online quizzes, tests and exams must be approved at least a week ahead of time.

For more information, contact Accessibility Services at 519-824-4120 ext. 56208, [email Accessibility Services](#) or visit the [Accessibility Services website](#).

### Open Learning Program Students

If you are an Open Learning program student who requires academic accommodation, please [contact the Academic Assistant to the Executive Director](#). Please ensure that you contact us before the end of the first week of your course (every semester) in order to avoid any delays in support. Documentation from a health professional is required for

all academic accommodations. Please note that all information provided will be held in confidence.

If you require textbooks produced in an alternate format (e.g., DAISY, Braille, large print or eText), please [contact the Academic Assistant to the Executive Director](#) at least two months prior to the course start date. If contact is not made within the suggested time frame, support may be delayed. It is recommended that you refer to the course outline before beginning your course in order to determine the required readings.

The provision of academic accommodation is a shared responsibility between OpenEd and the student requesting accommodation. It is recognized that academic accommodations are intended to “level the playing field” for students with disabilities.

## **Academic Misconduct**

The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community – faculty, staff, and students – to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

The [Academic Misconduct Policy](#) is detailed in the Undergraduate Calendar.
